

VANKAYALA AKHILESH

☎ +91-8125671508 ✉ akhileshvankayala158@gmail.com 📁 Portfolio 🌐 GitHub 🔗 LinkedIn 📍 Hyderabad, India

OBJECTIVE

Motivated Computer Science and Engineering student with a solid academic background and a strong interest in Artificial Intelligence, Machine Learning, Data Science, and Computational Science. Eager to apply programming, problem-solving, and technical skills to interdisciplinary research projects, while enhancing analytical abilities and contributing effectively in a multicultural and collaborative research environment.

EDUCATION

Anurag University Hyderabad, India <i>B.Tech CSE</i>	2024 - 2028 CGPA : 9.73/10
Sri Chaitanya Junior College Hyderabad, India <i>12th SSC</i>	2022 - 2024 Marks : 964/100
Vijayaratna High School Hyderabad, India <i>10th SSC</i>	2021 CGPA : 10/10

PROJECTS

Slack Clone | 🌐 Github 🌐 Website

- **Developed** a full-stack real-time chat application inspired by Slack, enabling **instant messaging, channel-based communication, and secure user authentication.**
- **Built** scalable **REST APIs** using *Node.js, Express.js, and MongoDB* for user management, chat handling, authentication, and message storage with **JWT-based security.**
- **Integrated** *Cloudinary* and *Multer* for media upload and management, supporting image sharing, optimized storage, and responsive message previews.
- **Utilized** *React, Vite, Tailwind CSS, Zustand, and React Hook Form* to create a modern, responsive, user-friendly frontend interface with efficient state management.
- **Designed** the application using a modular full-stack architecture with reusable React components, middleware-based backend structure, and real-time event-driven communication.

Technologies / Tools Used : *React, Node.js, Express, MongoDB, Tailwind CSS, Socket.io, JWT Authentication, Cloudinary*

HirBee | 🌐 Github 🌐 Website

- **Developed** a **full-stack Smart Placement Tracker** platform to enhance recruitment workflows for college Training & Placement Offices (TPO), managing **student applications, company drives, and placement analytics.**
- **Implemented role-based dashboards** for students and **administrators, enabling eligibility-based applications, recruitment status tracking, automated email notifications, and resume management.**
- **Built** secure **REST APIs** using *Node.js, Express.js, and MongoDB* with **JWT authentication** to manage student records, company drives, application workflows, and access control functionalities.
- **Integrated** *Cloudinary, Nodemailer, ExcelJS, and PapaParse* to facilitate **resume uploads, automate email communication, import CSV-based student data, and generate real-time placement reports** in Excel format.

Technologies / Tools Used : *React, Node.js, Express, MongoDB, Tailwind CSS, Nodemailer, ExcelJS, PapaParse*

Result Extractor Web Application | 🌐 Github 🌐 Demo

- **Developed** a full-stack web application to automate **extraction** and analysis of student results from a university portal using *Python (Flask), Selenium, and Next.js.*
- **Implemented** a robust backend with *Flask* and *Selenium* for **automated data scraping**, processing with *Pandas*, and **dynamic PDF/Excel report generation.**
- **Built** a responsive frontend using *Next.js* and *React*, enabling users to search, view, and download results with **98% accuracy** after searching **100+ records.**

Technologies / Tools Used : *Python, Flask, Selenium, Next.js, React*

PROJECTS

Accessible Campus Services | Github Demo

- **Developed** a full-stack web application for **physically challenged individuals**, enhancing mobility assistance and canteen ordering.
- **Achieved 100%** accuracy based on **10+ requests** in canteen orders, mobility assistance requests, and service requests sent via Gmail.
- **Utilized** *React, TypeScript, Vite, and Tailwind CSS* for a modern, responsive UI; **integrated** *Supabase* for authentication and real-time data.
- **Automated** deployment processes and managed secure environment variables; enabled service dashboards and an **AI-powered chatbot** for support.

Technologies / Tools Used : React, TypeScript, Vite, Tailwind CSS, Supabase, GeminiAPI

Route Optimisation System | Github Demo

- **Developed** a **full-stack biomedical waste collection optimization system** to automate hospital waste management, improving **route planning** and delivering operational analytics through an interactive web platform.
- **Implemented** a **capacity-aware route optimization engine** using *Dijkstra's Algorithm* and *NetworkX* to compute the shortest waste collection paths, considering truck capacity constraints and multi-trip planning.
- **Established** secure **role-based access control** for **administrators, staff, and drivers** using **JWT authentication** and *bcrypt*, facilitating effective route monitoring and waste tracking.
- **Designed** scalable **REST APIs** with *FastAPI, SQLAlchemy, and SQLite* for **hospital management, analytics reporting, route computation, and real-time operational workflows**, supported by **Docker-based deployment**.

Technologies / Tools Used : React, TypeScript, Python, SQLAlchemy, SQLite, NetworkX, Docker Compose, Docker

POSITIONS OF RESPONSIBIITY

Technical Member, Salesforce Club, Anurag University

- Co-ordinated *The Great Asia AI Summit 2026*, ensuring a smooth experience for participants.
- Welcomed and guided attendees, addressing queries to enhance engagement.
- Supported event organization and operations to achieve effective coordination.

SKILLS

Databases :	MongoDB, MySQL, Supabase
Frameworks & Libraries :	React, Next.js, Node.js, HTML, CSS, JavaScript, Bootstrap, Express.js, Tailwind CSS
Tools & Platforms :	Git, GitHub, Docker, VS Code, Google Collab
Soft Skills :	Communication, Leadership, Teamwork, Problem Solving, Adaptability, Time Management, Collaboration, Decision Making, Critical Thinking
Programming Languages :	C, C++, Java, Python, JavaScript

CERTIFICATIONS

Programming In Java
