

VANKAYALA AKHILESH

Computer Science Student | Data Structures & Algorithms | Problem Solving | Web Development

☎ +91-8125671508 ✉ akhileshvankayala158@gmail.com 🌐 Akhileshvankayala 📄 akhilesh-vankayala-5ba7b1343 📍 Hyderabad, India

SKILLS

Programming Languages :	C, Java, Python, C++
Frameworks & Libraries :	HTML, CSS, JavaScript, Bootstrap, React, Node.js, Express.js
Tools & Platforms :	Git, GitHub, VS Code, Jupyter Notebook, Google Collab
Databases :	MongoDB
Soft Skills :	Communication, Teamwork, Problem Solving, Adaptability, Time Management
Languages :	English, Telugu(Native), Hindi

PROJECTS

Result Extractor Web Application | 🌐 Github 🔗 Demo

- **Developed** a full-stack web application to automate **extraction** and analysis of student results from a university portal using **Python (Flask)**, **Selenium**, and **Next.js**.
- **Implemented** a robust backend with **Flask** and **Selenium** for **automated data scraping**, processing with **Pandas**, and dynamic PDF/Excel report generation.
- **Built** a responsive frontend using **Next.js** and **React**, enabling users to search, view, and download results with **98% accuracy** after searching 100+ records.

Technologies / Tools Used : Python, Flask, Selenium, Next.js, React

Accessible Campus Services | 🌐 Github 🔗 Demo

- **Developed** a full-stack web application for **physically challenged individuals**, enhancing mobility assistance and canteen ordering.
- **Achieved 100%** accuracy based on 10+ requests in canteen orders, mobility assistance requests, and service requests sent via Gmail.
- **Utilized** React, TypeScript, Vite, and Tailwind CSS for a modern, responsive UI; **integrated** Supabase for authentication and real-time data.
- **Automated** deployment processes and managed secure environment variables; enabled service dashboards and an AI-powered chatbot for support.

Technologies / Tools Used : React, TypeScript, Vite, Tailwind CSS, Supabase, Gemini API

Interactive Single-Player Quiz Application | 🌐 Github 🔗 Demo

- **Developed** a full-stack **quiz application** using Java backend and modern web technologies.
- **Implemented** server-side architecture with custom **Stack** and **LinkedList** data structures, RESTful API design, and session management for quiz logic.
- **Executed** an engaging frontend with vanilla JavaScript, HTML5, and CSS3, featuring responsive design, real-time timer, and lifeline systems.

Technologies / Tools Used : Java, JavaScript, HTML5, CSS3

EDUCATIONS

Anurag University

Bachelor of Technology (B.Tech)

Aug 2024 - Present

CGPA : 9.80/10

- **Bachelor of Technology (B.Tech) in Computer Science and Engineering**; Expected Graduation: **2028**

Sri Chaitanya Junior Kalasala

Board Of Intermediate Education

Percentage : 96.4

MPC - Secured **96.4%**

OBJECTIVE

Motivated Computer Science undergraduate seeking a **Software Engineering Internship** to apply strong programming skills in **Java** and **Python** for designing, developing, and improving scalable software solutions. Eager to contribute to collaborative engineering teams, utilize modern development practices such as **Agile** and **CI/CD**, and build innovative technology solutions that address real-world problems.
